Dumpster Policy

At a job site the following procedures must be followed:

- Before the dumpster placement, a permit **MUST BE** applied for and issued.
- As a policy, the placement of dumpsters on the street is discouraged. Police and Fire do not approve; and placement on the street causes a hardship for surrounding neighbors.
- The Building Department realizes that under certain conditions or extenuating circumstances, there may be a point during construction that a dumpster needs to be on the street.
- If the dumpster has to be placed on the street please locate it with the approval of this department and in consideration of neighboring driveways and general traffic.
- Flashing light barricades are required if the dumpster is placed on the street (see diagram for placement).
- Make your dumpster location part of the planning process.
- Dumpsters displaying graffiti will **NOT** be allowed.
- After the dumpster is removed, call Community Development at 630-530-3030 to arrange a final inspection of the parkway, sidewalk and street.

If the sidewalk, parkway or street is damaged as a result of the dumpster, the property owner will be assessed for damage repair.
